SK WALI ULLAH

Cybersecurity Professional | M.Tech in Cybersecurity
Phone: +91 6291289414 | Email: ullahskwali@gmail.com | LinkedIn: linkedin.com/in/sk-wali-ullah-5b0401213

Location: West Bengal, India | Open to relocate: UAE & Global opportunities

PROFESSIONAL SUMMARY

Cybersecurity postgraduate (M.Tech, KIIT University, CGPA 8.78) specializing in network security, intrusion detection, threat intelligence, SIEM implementation, and cloud security. Published researcher with hands-on experience in AI-driven ransomware detection, vulnerability assessment, IBM QRadar SIEM deployment, and Microsoft Azure security. Seeking IT/Cybersecurity roles in the UAE and global markets. Eligible for immediate relocation.

CORE COMPETENCIES

Network Security • Intrusion Detection & Prevention • SIEM (IBM QRadar) • Threat Detection & Analysis • Cloud Security (Azure) • Vulnerability Assessment & Penetration Testing • Ransomware Detection • IoT Security • Machine Learning for Cybersecurity • Incident Response • Identity & Access Management (IAM) • Security Operations (SOC) • Ethical Hacking • Risk Assessment

TECHNICAL SKILLS

Security Tools: Nmap, Wireshark, Metasploit, Ettercap, IBM QRadar
Cloud & IAM: Microsoft Azure (Defender for Cloud), Microsoft Entra, IAM
Programming & ML: Python, Scikit-learn, TensorFlow, XGBoost, Flask, Pandas, NumPy
Operating Systems: Kali Linux, Ubuntu, Windows Server
Protocols & IoT: MQTT, HTTP, CoAP — IoT edge security
Platform & ITSM: ServiceNow
Database: SQL
Other: Explainable AI (SHAP), PCA, Feature Engineering, REST API

EDUCATION

M.Tech – Computer Science & Engineering (Cybersecurity) *Jul 2024 – May 2026*
Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar | CGPA: 8.78

B.Tech – Computer Science & Engineering *Jul 2018 – Jun 2022*
Brainware Group of Institutions – SDET | CGPA: 8.84

Higher Secondary (Class 12) – W.B.C.H.S.E. *Feb 2017 – Mar 2018*
| Score: 61.8%

Secondary (Class 10) – W.B.B.S.E. *Feb 2014 – Mar 2015*
| Score: 72%

M.TECH THESIS

A Lightweight Hybrid DNN–XGBoost Framework for Explainable Intrusion and Ransomware Detection in IoT Edge Environments | KIIT University *2024 – 2026*
Guide: Dr. Ajit Kumar Pasayat, Associate Professor, School of Computer Engineering, KIIT

- Designed a lightweight hybrid intrusion detection system (IDS) combining Deep Neural Network (DNN) feature extraction with XGBoost classification for IoT edge environments.
- Achieved 99.88% accuracy, 99.55% precision, 99.67% recall, and 99.61% F1-score with AUC of 0.9999 across multi-dataset evaluation (SDN, UNSW-NB15, NSL-KDD — ~1.59M samples).
- Implemented SHAP-based Explainable AI (XAI) to provide transparency and feature-level interpretability for security analysts.

- Optimized for resource-constrained IoT edge devices with low computational overhead (PCA dimensionality reduction, dropout regularization, Adam optimizer).
- Paper submitted for review: IEEE SILCON-2026, NIT Manipur, India (under review).

PROJECTS

AI-Based Ransomware Detection System for IoT Devices | Academic Project *2024 – 2025*

- Built a real-time ransomware detection system with 95% detection accuracy and under 2-second response time on IoT smart home devices.
- Implemented a hybrid ML pipeline (Random Forest + SVM) combined with rule-based heuristics, reducing false positives to 3%.
- Developed a Flask web dashboard with live monitoring, multi-channel alerting, and performance optimization.
- Optimized for IoT resource constraints: <15% CPU usage, 180 MB RAM, handling 100+ operations/second.

Technologies: Python, Scikit-learn, Flask, Watchdog, MQTT, Pandas, JavaScript

Network Vulnerability Assessment | Lab Project *2023 – 2024*

- Conducted comprehensive vulnerability scans on simulated enterprise networks using Nmap and Wireshark to identify open ports, misconfigured services, and unencrypted protocols.
- Captured and analyzed network traffic to detect security gaps and potential attack vectors.
- Developed proficiency in reconnaissance, enumeration, and ethical hacking techniques aligned with industry best practices.

Technologies: Nmap, Wireshark

SIEM Implementation Lab | Lab Project *2023 – 2024*

- Deployed and configured IBM QRadar SIEM in a simulated lab environment, integrating log sources from multiple systems.
- Analyzed security events, created custom correlation rules, generated alerts, and simulated incident response workflows.
- Gained hands-on experience in log management, anomaly detection, and SOC analyst operations.

Technologies: IBM QRadar

CERTIFICATIONS & CREDENTIALS

Palo Alto Networks Cybersecurity Professional Certificate

Cloud Security Fundamentals | Security Operations Fundamentals | Cybersecurity Foundation | Network Security Fundamentals

Red Hat System Administration I – RH124 (ver. 9.3)

SOFT SKILLS & LANGUAGES

Soft Skills: Communication, Team Collaboration, Critical Thinking, Adaptability, Problem Solving

Languages: Bengali (Native), English (Fluent), Hindi (Fluent)

Open to UAE Visa Sponsorship | Available for Immediate Relocation | Valid Indian Passport
